- Manufacturing and Production
- Hotels and Hospitality
- Schools and Churches
- College Dormitories
- Storage Facilities
- Financial Services
- Media and Broadcast
- Art Galleries and Museums
- HVAC Monitoring and Testing

How Does It Work?

1. Plug in the wireless gateway.

See back for more information

2. Attach sensors to "things" you want to monitor.

3. Manage sensors online and receive alerts for things you want to know.

1 Wireless Gateways

- Use up to 100 wireless sensors with one Monnit gateway
- Different versions available
 - Cellular Gateway (CDMA or GSM)
 - Ethernet Gateway
 - USB Gateway
 - Serial MODBUS Gateway
- Cellular gateways are available with 24 hour battery backup
- 250 - 300 ft. device range*

See more at www.monnit.com

2 Wireless Sensors

- Over 40 sensor types available
- 250 - 300 ft. device range*
- 1-5+ years battery life**

3 Monitoring Software

iMONNIT™ ONLINE WIRELESS SENSORS PORTAL

Basic online sensor monitoring and notifications are included with all wireless sensors for free. Advanced sensor monitoring is available with iMonnit Premiere for a low annual cost.

iMonnit Premiere Features;

- Unlimited user accounts
- Sensor check-ins down to 10 minutes
- Unlimited sensor data storage
- Sensor mapping tools
- Advanced sensor configurations

* Actual range varies depending on use.

** Battery life is affected by reporting frequency (heartbeat), sensor type, distance from gateway and other variables.

*** Wi-Fi sensors connect directly to existing Wi-Fi networks without the need for a Monnit gateway.

Additional Products

Interested in control solutions for your wireless sensor network? Do you need farther range between your wireless sensors and gateways? Check out the latest Monnit wireless products.
