

Of Course an Orderly Restroom is Important to You... And Your Customers!

NotiFAC[™] by **MONNIT**[™]

Wireless Notification System for Facilities

How The System Works:

- 1 Secure the service notification wall plates in your facility restrooms.
- 2 Place the main notification unit where it is easily visible by your staff.
- 3 When a customer pushes the button on the wall plate, the notification unit lights will begin to blink, alerting your staff of which restroom needs attention.
- 4 After the restroom has been serviced, simply push the reset button on the notification unit to reset the system.

Benefits of Using Monnit's NotiFAC™ Wireless Notification System

We know that a clean restroom is important to you and it contributes to your customers overall experience while visiting your facility. Monnit can help you deliver the service your customers expect and deserve.

With the NotiFAC™ Wireless Notification System, you can enjoy the peace of mind that comes from knowing that your customers needs will be immediately met at the push of a button.

Using the NotiFAC™ Wireless Notification System helps keep your team more efficient while simplifying the customer service process. Build customer loyalty by maintaining a clean and safe environment throughout your facility.
