

## Quick Start Guide - Cellular Gateway and Sensors

# Simple Setup

1.

Create an online sensor monitoring account at [www.imonnit.com](http://www.imonnit.com).

2.

Follow the on-screen instructions to add devices to your account.

3.

Connect the wireless gateway antennas and power supply (all lights should turn green).

4.

Insert batteries or use switch to power the wireless sensors on.

5.

View your sensor data from your online account or mobile app, and customize sensor settings.

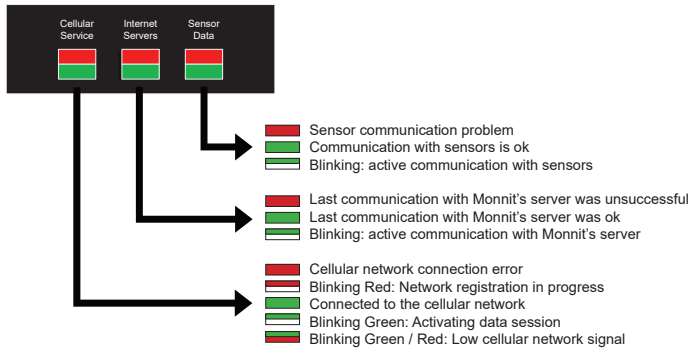

6.

Create notifications for things you want to know about.

# The Basics

## Monnit Cellular Gateway Lights

**Note:** If the lights do not turn green view cellular gateway troubleshooting information at, <http://www.monnit.com/support/>.

## Sensor Settings

From the overview page click on a sensor row to access detailed information. Click the “Edit” tab to change the sensor settings.

**Note:** Changes made to a sensor's settings will be applied on the next sensor heartbeat (check-in). Additional changes can not be made until the sensor has applied the previous changes. To force sensor communication, power cycle the sensor by removing the battery, waiting 30 seconds, then reinserting the battery.

## Sensor Events

Click “Events” in the main menu. Click “Add Event” then choose the type you want to create.

### Types of Notifications

**Sensor Reading** - Alert based on sensor reading or activity.

**Battery** - Alert based on battery power remaining.

**Device Inactivity** - Alert when a sensor has not checked in.

**Trigger Conditions** - Set conditions that trigger the notification.

The form is titled 'Trigger Conditions'. It has a 'Name' field with the value 'TemperatureData Greater Than 10'. Below it, there is a dropdown menu for 'Notify when temperature reading is' set to 'Greater Than'. A text input field contains the value '100'. At the bottom, there is a 'Save' button.

**Sent From** - Select devices (sensors and gateways) that will cause the notification to be sent.

**Actions** - Click the notification method icon to select how they will receive the alert. (green is on, grey is off).

All notifications will show in the list after they are created.
